Synchronized Skating – What is it!!!

Synchronized skating is a team sport in which 8-20 skaters perform a program together. It uses the same judging system as singles, pairs and dance and is characterized by teamwork, speed, intricate formations and challenging step sequences. As with the other disciplines, all teams perform a free skate with required well-balanced program elements. In addition, teams at the junior and senior level perform a short program consisting of required elements.

Elements in synchronized skating include blocks, circles, wheels, lines, intersections, move elements, creative elements, no holds elements, spins and pairs moves. The variety and difficulty of elements require that each team member is a highly skilled individual skater. The typical senior-level athlete has passed a senior or gold test in at least two disciplines.

For more information about synchronized skating, visit www.usfigureskating.org/programs/synchronized.

And did you know the Bremerton Ice Center is trying to form a synchronized skating team. If you are interested in being a part of this, contact the BIC Learn to Skate Director, Ann Baharie, or BFSC coach, Jackie Ashley. Beginning levels welcomed, starting at Basic 3!!!!1
